

JAIME A. DE LA PAZ

Rogers City, MI | 469-834-8816 | delapazjaime@yahoo.com | github.com/jaime-builds | jaime-builds.github.io

PROFESSIONAL SUMMARY

Seasoned Technical Support Engineer with 15+ years of experience resolving complex technical issues across SaaS, developer tooling, cloud, and enterprise IT environments. Proven expertise in Tier 3 escalation, REST API debugging, SQL troubleshooting, incident response, and cross-functional collaboration with Engineering and Product teams. Skilled in Linux/Unix systems, Docker, CI/CD pipelines, Python scripting, and observability tooling. Strong record of building support operations from the ground up, maintaining SLAs under pressure, and turning complex technical problems into clear solutions for customers. Bilingual (English/Spanish).

CORE COMPETENCIES

Tier 3 Escalation & Troubleshooting • REST API Debugging • SQL & Database Analysis • Incident Management & RCA • Linux/Unix Systems • Docker & Kubernetes • CI/CD Pipelines • Python & Bash Scripting • Terraform & Terragrunt • Observability (Datadog, Prometheus, OpenTelemetry) • SLA Management • Jira • Zendesk • Confluence • PCI DSS Compliance • Technical Documentation • Customer-Facing Communication • Bilingual (English/Spanish)

PROFESSIONAL EXPERIENCE

Enterprise Support Engineer | Depot.dev

Remote | March 2026 – Present

- Handle technical support requests across all Depot offerings, advising customers on best practices for Docker builds, GitHub Actions workflows, and CI/CD pipeline optimization
- Debug and resolve complex build failures, cache performance regressions, and pipeline integration issues across diverse customer environments and build configurations
- Identify product and resource gaps in customer contexts and collaborate with Engineering to prioritize and escalate issues
- Assist customers migrating from legacy build infrastructure to Depot's platform, ensuring smooth adoption and long-term success
- Author troubleshooting guides, knowledge base articles, and documentation to prevent recurring issues and empower customers to self-serve

Technical Support Engineer | Subscribe Pro, Inc

Remote | April 2024 – March 2026

- Resolved complex customer technical issues involving REST APIs, Shopify, Magento, Salesforce Commerce, Cloudflare, HTML, and CSS across a subscription commerce PaaS platform
- Led PCI DSS and SOC 2 audit processes, implementing security controls, compliance documentation, and audit evidence collection
- Automated AWS environment provisioning using Terraform and Terragrunt, reducing manual setup time and improving infrastructure consistency
- Managed Zendesk operations including ticket workflows, SLA tracking, escalation routing, and reporting dashboards
- Served as SME for third-party integrations, collaborating with partners and Engineering to resolve complex integration failures
- Administered endpoint security, access management, SaaS applications, and IT helpdesk operations organization-wide
- Produced customer-facing documentation, technical tutorials, and internal runbooks for platform operations

System Engineer III | Solera Holdings

Remote | December 2022 – April 2024

- Delivered Tier 3 escalation support for infrastructure and application issues across a fleet of 25,000+ servers
- Built and maintained monitoring infrastructure using New Relic, Icinga, and Datadog, enabling proactive detection and faster incident resolution
- Managed security patching, vulnerability remediation, and compliance across large-scale distributed environments

- Designed automation suites for application deployment, reducing manual effort and improving deployment consistency
- Authored technical runbooks, disaster recovery procedures, and operational documentation for infrastructure teams

Technical Support Engineer, Tier 3 | OpenGov, Inc

Remote | December 2021 – December 2022

- Resolved escalated infrastructure and application issues using SQL, API log analysis, and advanced system troubleshooting
- Collaborated with Product and Engineering on bug resolution, release validation, and outage response
- Authored Root Cause Analyses (RCAs) and release notes for customer communication and internal knowledge base
- Maintained 24/7 on-call rotation supporting mission-critical government software platforms

Systems Support Engineer | amazee.io

Remote | August 2019 – December 2021

- Delivered post-onboarding technical support for enterprise clients on cloud-native DevOps infrastructure
- Contributed to CI/CD pipeline implementations, container orchestration troubleshooting, and infrastructure scaling
- Created RCAs, knowledge base articles, and customer-facing technical blog content on DevOps best practices

Cloud Support Engineer | SailPoint, Inc

Austin, TX | October 2018 – August 2019

- Diagnosed and resolved customer issues involving Active Directory, REST APIs, SAML authentication, and identity management systems
- Configured and supported client environments on AWS and on-premises infrastructure
- Created user-facing documentation and guided customers through complex integration workflows

Senior Support Engineer | Spiceworks

Austin, TX | June 2014 – October 2018

- Provided expert technical support for IT management software covering network monitoring, asset management, and help desk tooling
- Authored SQL-based reporting solutions and comprehensive internal and external documentation
- Mentored junior engineers on troubleshooting methodology and collaborated with Development on bug identification and resolution

Additional Experience: System Administrator at Daryl Flood, Inc (network and server administration, Active Directory); Technical Support Representative at IBM; Tier II Technical Support at AT&T; Project Manager and Trainer at Alliance Data (2005–2014)

CERTIFICATIONS

- ClickHouse Core Certification — ClickHouse, Inc. (February 2025, Expires February 2027)
- Datadog: Configuration Learning Path (January 2026)
- Datadog: Core Skills Learning Path (January 2026)
- IBM: Getting Started with Artificial Intelligence (January 2026)
- The Linux Foundation: LFS148 — Getting Started with OpenTelemetry (January 2026)
- Shopify: Development Fundamentals Verified Skill Badge (December 2024, Expires December 2026)
- Shopify: Foundations Certification (June 2024, Expires June 2026)

EDUCATION

Associate of Applied Science in Computer Network Systems

ITT Technical Institute | March 2011 – May 2013 | GPA: 3.9
